

## **SOFTWARE RELATED COMMERCIALIZATION**

### **Overview of JHU software innovations and details on AIX, Intellectual Property and Open-Source**

Join fellow researchers for an informational presentation by JHTV staff, followed by a casual networking reception. The session will provide Johns Hopkins researchers with an overview of basic concepts in university commercialization and information about software discoveries.

#### **RECOMMENDED ATTENDEES**

Junior faculty, postdocs and graduate students who are solving scientific problems in the lab that can improve the world.

#### **DISCUSSION TOPICS**

- Commercialization and its importance to JHU and beyond
- Identifying if an invention is worth “reporting”
- Securing intellectual property protection and licensing technology
- Licensing process for software versus life sciences discoveries
- Results from the commercialization of software-based JHU technologies
- Open-source software and commercialization
- How AIX will affect the future of software related discoveries
- How to get started and where to learn more

#### **RECEPTION**

We encourage you to stay to meet the JHTV team and network with fellow inventors. Beer and snacks will be served.

#### **QUESTIONS**
