

Masters Co-Op Information Session

The Institute for NanoBioTechnology collaborates with major industry partners to offer a Cooperative (Co-Op) Education program for masters of science in engineering (MSE) students. The program provides MSE students career training while employed for six months where they gain work experience, network, and build technical and non-technical skills that prepares them for a competitive job market. Students receive a salary from the company while employed and college credit for completing the requirements.

Current and prospective MSE students are welcome to our information session to learn more about the program. Refreshments will be provided.
