1-2:30 p.m.

Hopkins Bloomberg Center
The Kenney Link - 430
555 Pennsylvania Ave. NW
Washington, DC 20001

The new Trump administration is pursuing intense transformation of how our government works. One of the administration's stated goals, "Make America Healthy Again," includes objectives that will require new thinking about preventing and treating chronic illnesses and eliminating health inequities. This dynamic panel discussion will debate the philosophical, financial and health implications of a reimagined health care system that pushes the boundaries of traditional care to include investments in mitigating harmful social determinants of health—an approach that has supporting and opposing views.
