

Master's Co-Op Information Session

To broaden the opportunities for Master of Science in Engineering (MSE) students in the Whiting School of Engineering, the Institute for NanoBioTechnology (INBT) collaborates with major industry partners to offer a credited and paid co-op opportunity to MSE students. Participating students work at a biotech or other engineering company for six months and receive full-time pay and credits equivalent to a year of academic research. They also build their professional network and gain technical and non-technical skills that prepare them for a competitive job market.

Current and prospective MSE students are welcome to join our information session to learn more about the program. Refreshments will be provided.

February 19, 2026
12:00 pm - 1:00 pm ET
Croft Hall G40
