

# Masters Industry Co-Op Program Information Session

"My team treated me as a contributing member to the project and not just a student"

"They were invested in my professional development and making the most of my experience"

September 2, 2021 - 10:00 am

The Masters Industry Co-Op Program provides students career training while employed with a major industry company. Gain work experience, network, and build technical skills to prepare for a competitive job market. Students earn a salary and receive college credit during employment.
