3:15 - 4:15 PM
Lecture, Q&A

December 2, 2021

Dr. Andrew Holland explores the molecular mechanisms that control accurate chromosome distribution and the role that mitotic errors play in human health and disease.

In 2021, he received the \$250,000 President's Frontier Award to purchase a new live-cell imaging microscope to observe and manipulate dividing cells with unparalleled precision.

Dr. Holland is an Associate Professor of Molecular Biology and Genetics in the School of Medicine.
